Re: KPRG (FM), Agana, Guam
Facility Identification Number: 25515
Guam Educational Radio Foundation
Special Temporary Authorization

Dear Mr. Kelley:

This is in reference to the request filed May 1, 2007, on behalf of Guam Educational Radio Foundation ("GER"). GER requests extension of the special temporary authority ("STA") granted on November 1, 2006, to operate Station KPRG with emergency antenna facilities pursuant to Section 73.1680.¹

In support of the request, GER states that its application for construction permit is pending before the Commission and that, upon grant of its application and relocation of two other stations' antennas, it will construct the modified facilities for Station KPRG.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates Construction Permit BPED-20070212AAP was granted on July 6, 2007; thus, the licensee has made substantial progress toward restoration of licensed operation, and, extension of STA is warranted to allow time for construction of the newly authorized facilities.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KPRG may continue to operate with the following facilities:

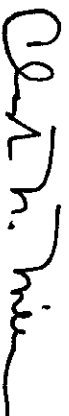

¹ KPRG is licensed for operation on Channel 207C3 (89.3 MHz) with effective radiated power ("ERP") of 6.6 kW and antenna height above average terrain ("HAAT") of 164 meters. Construction permit BPED-20070212AAP authorizes relocation of the transmitter and operation with ERP of 9.2 kW and HAAT of 162 meters.

Channel:	207 (89.3 MHz)
Geographic coordinates:	13° 29' 17" N, 144° 49' 53" E
Effective Radiated Power	2.8 kilowatts (V only)
Antenna:	3/4 wave vertical radiator
Antenna elevation:	
above ground level	48 meters
above mean sea level	234 meters
above average terrain	171 meters
ASRN ²	1058188

GER must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **April 19, 2008**.

Sincerely,

Charles N. Miller, Engineer
